# Keyfree 100

Combination Lock Instructions

# Setting your combination lock

**STEP 1: Default Code Check**

The lock is preset at the factory to "0-0-0-0."

If this is your first time setting the code, turn the dials to "0-0-0-0."

If the code has already been changed, enter the current code instead.

**STEP 2: Engage Code Setting Mode**
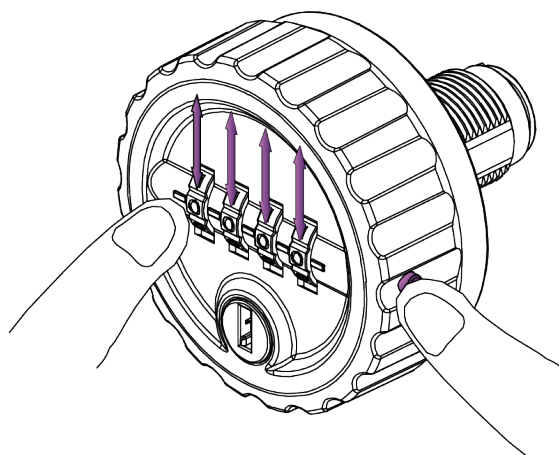

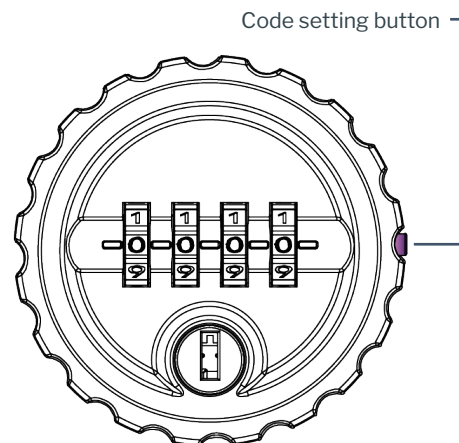

Press and hold the code-setting button firmly.

**STEP 3: Set Your Desired Code**

While holding the button, turn the dials to your preferred combination.

Release the button once the desired code is set.

**STEP 4: Secure the Lock**

Scramble the dials to lock the mechanism.

Code setting button

# Resetting a lost code

**STEP 1: Open the Lock with the Master Key**

Insert the master key into the lock and turn it 90 degrees to the right.

**STEP 2: Discover the Code**

With the key turned, spin the dials downwards, top to bottom.

Each dial will stick at the correct number.

Continue until all four dials stick. The numbers displayed are the current code.

**STEP 3: Reset the Code**

Once you have the code, reset it by following the steps in the "Setting Your Combination Lock" section above.
