

Delivering Access Excellence

For more than 40 years, Industrilas has been developing and manufacturing access solutions that enhance the value of our customers' products. At Industrilas, we have total control of the production chain, from design and the casting of metal – to the finishing touches.

In close collaboration with our customers, we have developed solutions with outstanding performance for many segments, such as HVAC, Commercial Vehicles, Con-Ag Machinery, Power Generation, Power Distribution, Data Centres, Food, Pharmaceutical, IT and Telecom.

When Access Counts

Industrilas develops, designs and manufactures access solutions for all kinds of industrial applications. Our main drive is a never-ending curiosity about our customers and their business. We are passionate about finding solutions that will enhance the performance of our customers' products and their business.

We openly welcome you into the Industrilas family, and together we will find the best possible solution to the challenges you are facing. Sometimes this means a well-proven standard solution and at other times it means the innovation of something the world has never seen.

Industrilas is a Swedish company, founded in 1981. Over the course of 40 years, we have grown from a one-person startup to become one of the world's leading suppliers of access solutions. Today, we are present in more than 40 countries and have manufacturing sites in Europe, North America, South America and Asia.

The group's head office is in Nässjö, Sweden.

When you grip a handle for the first time, it is a telling moment. It is like shaking hands with the cabinet, vehicle or door you are about to open. Since first impressions are important, it is vital that the handle gives you a positive feeling.

Industrilas Klima-flex™

Industrilas Klima-flex™ is the most comprehensive latching system for HVAC applications available today. It contains patented products, surface-mounted and through-mounted systems, handles, latching hinges, hinges and accessories. Klima-flex delivers a straightforward and safe access solution platform for all types of insulated, double-skinned and pressurized doors.

Industrilas Vector™

Industrilas Vector™ saw the light of day more than twenty years ago, with the birth of the first Vector T-handle. Since then, it has set the standard for heavy-duty access solutions for all types of vehicles and heavy machinery. Vector includes patented innovations and central locking options. They are vibration resistant according to DIN EN 61373 and the gasket compression ensures sealing that keeps water, snow, ice and dirt at bay.

Industrilas Vision™

Industrilas Vision™ is a very versatile family with complete multipoint latching systems, suitable for Power Generation, Power Distribution, EV Chargers, Data Centres, IT and Telecom. Vision include patented products, can be installed inside or outside the sealed area and are certified according to IP-standards and GR-487. If you desire, there are also handles that are break-in and vandalism certified RC2, according to EN 1627.

Mechatronic Solutions

Mechatronic latching combines mechanics and electronics. The solutions can be monitored, accessed remotely and connected to the cloud. They can have keypads, RFID readers, biometric readers and face recognition. Industrilas offer electromechanical products for a variety of applications, such as all types of vehicles, exterior and interior doors, windows, data centres, cabinets and lockers.

Quarter-turns

The range and possible adaptations of quarter-turns are endless, making them the perfect fit for all types of applications. Industrilas offers everything from regular quarter-turns for simple applications, to stainless steel versions with vibration resistance according to DIN EN 61373. Quarter-turns can have compression functions as well as being water- and dustproof.

Hinges

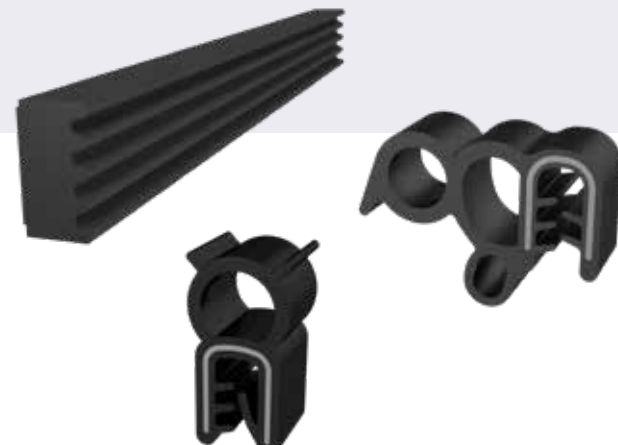

Industrilas offers a wide variety of hinges for all kinds of purposes, with many in stainless steel. Depending on your needs, you can choose everything from heavy-duty hinges that are shock and vibration tested, to a multitude of hinges for applications that require a lesser amount of strength. We have vast experience of designing and manufacturing customized articulating and special hinges.

Profiles

Our range of profiles include certified sealing profiles, edge-protection profiles, glazing profiles and self-adhesive gasket profiles. Profiles are available in Ethylene-Propylene Diene Monomer (EPDM), natural rubber (NR), Nitrile rubber (NBR) and Polychloroprene (CR). We can cut profiles in fixed lengths to fit your applications and also deliver profile frames with glued or vulcanized corners, ready to install on your door or door frame.

Vehicle Accessories

Con-Ag machinery, commercial vehicles and work trucks often need extra solutions for specific purposes. In our range of accessories, we offer products for a number of those purposes. For instance: a wide selection of electrical and air-driven ventilation products, lighting solutions for basically every purpose outside and inside of vehicles, glass-top roof hatches, lashing rings, grab handles and door retainers.
