DIRECTIVE 2011/65/EU on the restriction of the use of certain hazardous substances in electrical and electronic equipment Statement of compliance

The RoHS-directive restricts the use of certain hazardous materials in the manufacture of various types of electronic and electrical equipment. The directive requires that certain substances are not allowed to exceed maximum concentration values by weight in homogeneous materials as specified in Annex II to directive 2011/65/EU and amendments.

The company's operations include the design, manufacture and distribution of various innovative, high-quality latching systems, handles, hinges, profiles and accessories for industrial applications.

After review of all available information and repeated verification of our manufacturing process data we confirm to the best of our knowledge and belief that none of the substances mentioned in Appendix II were intentionally added to the finished products, nor were they intentionally used in our manufacturing processes.

With respect to our range of deliveries we confirm that the materials used to manufacture our electrical and electronic equipment do not contain any of the substances listed below in an non permitted amount and therefore meet the requirements of the RoHS2/RoHS3 directives.

- Lead
- Mercury
- Cadmium
- Chromium VI
- Polybrominated biphenyls (PBB)
- Polybrominated diphenyl ether (PBDE)
- Di-2-ethylhexyl phthalate (DEHP)
- Benzyl butyl phthalate (BBP)
- Dibutyl phthalate (DBP)
- Di-isobutyl phthalate (DIBP)
