

VECTOR PULL HANDLE

Robust handle to operate doors equipped with Vector Rotary Latches or Vector Latch Points. The freewheeling locking mechanism ensure the latched status of the door in every situation, regardless of how much force is applied to the handle. Vector Pull Handle is ordered either as an actuator for a single point latching system or as a multi version with the possibility to connect a maximum of three latching points to the handle. The connection to the latch points can be done with either Vector cables or rods. Sealed against water and dust with o-ring and molded TPE-gasket.

MATÉRIAU

Body: Polycarbonate and acrylic styrene acrylate terpolymer (PC/ASA)

Bracket: Acier, galvanisé

Boulons moulés: Acier, galvanisé

Cylinder: Zinc die cast, stainless steel 304 cap and dust shutter

Gaskets: TPE

Poignée: Zinc die cast, chrome plated or black texture powder coated

O-ring: Silicone

Spring: Spring steel EN 1.4310
