

COMPRESSION LATCH STAINLESS STEEL 35 MM

Quarter-turn compression latch with an extended collar, making it suitable for thick panels. Closed and tightened with a single half-turn motion, where the first 90° turn moves the cam 90° and the following 90° turn retracts the cam 6 mm. The extended, threaded shaft allows you to place the cam along its entire length, resulting in vast adjustment possibilities. The cam is fixed with counter-nuts.

The latch is delivered assembled while the cam is ordered separately.

MATERIAL

Counter-nuts: Stainless steel 303

Housing: Stainless steel 304

Insert: Stainless steel 303

Nut: Stainless steel 303

RELATED PRODUCTS

Handles and knobs: 2-360
