

VECTOR CABLES

Vector cables to connect Vector latchpoints, for example Vector rotary latches, Vector actuators and Vector pull handles. Low friction and tension ensures precise and smooth motion control. The L-shaped end-fittings attach easily and securely to the latch points and actuators. Vector cables are equipped with threads for adjustment on both ends, making it easy to adjust on both latch point and actuator side. Other lengths are available upon request.

MATERIAL

Cable: High carbon steel
Cable casing: PVC
End Fittings: Zinc die cast
Nut: Steel, zinc plated
