

KLIMA-FLEX LATCH HINGE GEN2

The patented Klima-flex latch hinge is specifically for insulated and pressurized doors. The hinge creates 6 mm compression and allows you to open the doors 180° in either direction, or to remove the door completely.

The safe two-stage opening process allows the cabinet to depressurize before it is fully opened. A distinct click delivers tactile feedback on whether the door is open or closed. For extra stability, mounting bracket is available.

Meets the requirements for sealing level L1 according to DIN EN 1886.

MATERIAL

Cylinder: Zinc die cast, stainless steel 304 cap and dust shutter

Door part: Glass fibre reinforced polyamide (PA6GF30)

Frame part: Zinc die cast, black powder coated

Handle: Glass fibre reinforced polyamide (PA6GF30)

Insert: Zinc die cast, black texture powder coated

Latching cam: Zinc die cast, black powder coated

Mounting bracket: Zinc die cast, zinc plated

Pin: Stainless steel 304
